STATEMENT OF REASON FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: the claim recites a swirl nozzle assembly connected to a water supplying pipe for supplying fire extinguishing water a predetermined pressure, comprising: a main body having one end which is threadedly coupled to the water supplying pipe to be held fastened in direction where the fire extinguishing water is supplied and the other end which is internally threaded to form a coupling part; a filter positioned in an accommodating space which is defined inward of the coupling part of the main body, to filter foreign substances contained in the fire extinguishing water; a nozzle receiving element having one end which threadedly coupled the coupling part of the main body with the filter fixedly maintained inward of the coupling part, and the other end which internally threaded to form a nozzle coupling part, the nozzle receiving element being defined with a water collecting chamber; and a swirl nozzle threadedly coupled to the nozzle coupling part of the nozzle receiving element and structured to allow water droplets of a predetermined size to be sprayed at a predetermined scattering angle. This feature combined with other claimed elements are not taught in prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
